Solus eDMs

Are Media Solus eDMs provide advertisers with the opportunity to align with our premium brands and reach active email audiences.

Designed specifically for targeted and offer-led marketing messages, Solus eDMs are the perfect channel for advertisers to send exclusive offers, discount coupons or competition promotions directly to the inbox of potential customers.

Creative Production

Solus eDMs require a mandatory creative production charge for the Are Media Creative Studio to build a responsive design.

A responsive design ensures the EDM creative is adaptive to the device the email is viewed on such as mobile phones and tablets.

Flat image Solus eDMs have accessibility issues as the font size does not adjust, making the copy difficult to read on mobile phones. This leads to poor engagement and response as well as high volumes of spam alerts and unsubscribes.
